At the end of the course, participants will:

- Understand the reasons for Transition: peak oil, climate change, economic instability and social inequity.
- Understand the principles of Transition, Permaculture and Resilience.
- Understand of the Transition model and process, tools and ethos.
- Experience a vision of a positive fulfilling future, and be able to explain why this is so important.
- Gain knowledge of the steps of transition and how to engage the community into the transition process.
- Understand the stages of personal and societal change and people's perspectives and needs along the way.
- Experience new social technologies and how these can help unleash the collective genius in your community.
- Be able to take this knowledge back into your communities.
- And much more...!

*You will leave inspired, motivated and empowered to bring Transition to your community!*
